

ADP - 103

DVI to LVDS Converter Board

- An easy way to connect a DVI port to an LVDS LCD
- Supports LVDS LCDs up to 2560x1536
- Powered by the DVI port or External Power
- Uses the same Cables as the S1220 Board

The Systemation ADP-103 adapter board converts DVI to LVDS video. The conversion is 1:1 with no scaling. This low cost easy to use adapter provides a convenient way to connect an LVDS type LCD to an existing DVI port.

Systemation Technology, Inc. has been in the video controller and custom computer board business for more than 10 years. Our video expertise includes the development of standard products, such as the S1220 board, as well as many custom boards for use with military, aviation, industrial and commercial products.

Quick turns are our specialty

We can produce a custom prototype board in 8 weeks or less.
